An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In section [0001], line 2, after '2002,' insert --now patent number 6,723,142--.

The following is an examiner's statement of reasons for allowance:

The claimed invention is novel over the prior art of record because said art **fails** to teach or suggest an abrasive article which comprises the claimed components and limitations. Specifically, the limitations defined in part (d) of claim 1, part (d) of claim 8, part (d) of claim 14 and part (c) of claim 17 are **not** taught or suggest. Although Calafut (5,109,637), which is the closest prior art of record, teaches a flexible abrasive which when applied to a conical core by an adhesive has a conical shape, it is the examiners position that this does **not** teach or suggest the claimed invention because the article of the claimed invention specifically defines that a support material (core) is **not** used (i.e. the claims define the limitation "...without additional support"). In view of this, the scope of reference which specifically uses a core material is outside the scope of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1755

Although the limitations "said preformed portion...without additional support" (claims 1, 8 and 17) and said non-woven preformed portion...without additional support" (claim 14) are not literally supported by the disclosure, from reviewing the instant disclosure, as a whole, including the figures, it is the examiners position that the above limitations are supported. Specifically, the figures and sections [0013], [0029] and [0057]-[0063] of the disclosure provide reasonable support for the above limitations. As can be seen from this disclosure, the article is a preformed abrasive article that does **not** require any additional support. Since the above limitations are envisioned or reasonably suggested by the disclosure, they **can not** be construed as new matter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A Marcheschi whose telephone number is (571) 272-1374. The examiner can normally be reached on M-F (8:00-5:30) First Friday Off.
